## Education

2010-2014  
**High school bachelor**  
Liceo Alfaro Ruiz

2020-2024  
**Bachelor in Systems engineering**  
Universidad Americana

## Technical skills

### Development tools

PyCharm  
Visual studio code  
Jira  
GitHub

### Programming languages

Python  
C#  
HTML  
CSS  
Java

### Databases

MongoDB  
Microsoft SLQ server  
MySQL

### Methodology

Scrum

## Language

Spanish - native

English - intermediate B-1

# Jose Alberto Miranda

## System Engineer

I'm a smart person who is able to learn fast and I can describe myself as a passionate engineer who is constantly learning technologies that can help me to improve my skills. Additionally, I'm constantly taking different courses from online websites including a variety of programming languages as Python and Java, with tools such as PyCharm, .Net, visual studio code and NetBeans developing in these codes to maintain my skills up to date. I am currently looking for a place that give me the opportunity to challenge and force myself to grow professionally in the Development area and I would love and greatly appreciate the opportunity to work alongside people who are as passionate as I am.

## Experience

### University projects

During my university education, I collaborated in interdisciplinary projects that demanded technical skills and teamwork. These experiences allowed me to develop competencies in the field of software development, research and project documentation. We used tools such as GitHub and Jira, and implemented the Agile Scrum methodology for a more efficient and coordinated project management.

## Softskills

- Teamwork
- Communication
- Problem-solving
- Listening
- Questioning
- Logical and analytical thinking
- Detail orientation
- Initiative
- Decision-making
- Stress-management
- Adaptability
- Openness to criticism
- Creativity
- Time management and organization
